**"DUDGEON" OR EQUAL ?**

You have no doubt seen this phrase in connection with specifications for Hydraulic Jacks.

The **"Dudgeon" Jacks** are not only the pioneers, but they continually stand in a class by themselves in advance of every other type of Hydraulic Jack, and have no equal.

If you want the latest and best, always specify **"Dudgeon's."**

A condensed Pocket Price List, illustrating the **"Dudgeon" Universal Jack** and other well-known devices of Dudgeon manufacture will be sent for the asking. If you wish one of these catalogues write for Catalogue H.

## Incandescent Lamps for Every Use

Wherever an electric lamp is necessary—be it the tiny one-tenth candle-power or the impressive 400 candle-power lamp—we have the size and type of lamp needed.

# Carbon Gem Tantalum Mazda

The present high efficiency MAZDA lamp requires but one-third the current of the carbon filament lamps commonly in use. General Electric lamps are the result of 33 years' experience in lamp designing.

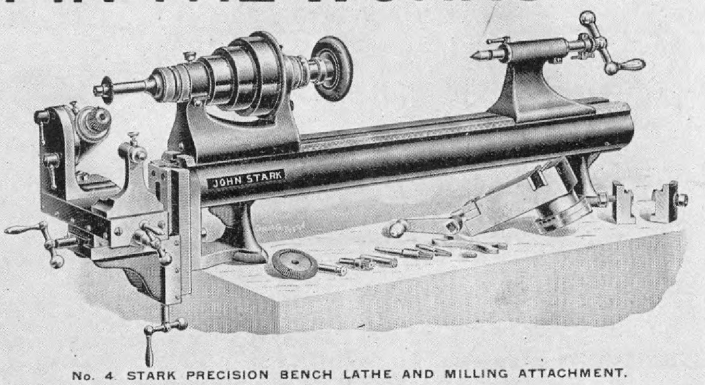
# LATHE IDEAS OF NOWADAY

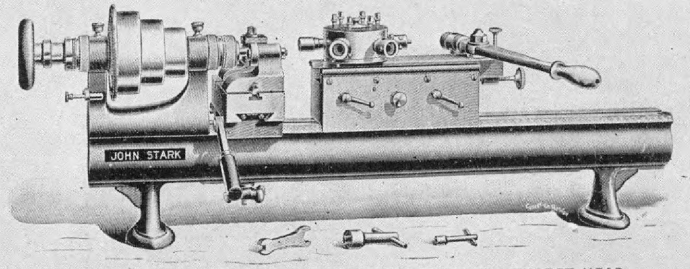
No. 4 STARK PRECISION BENCH LATHE.



Length of bed 38", distance between centers 20". Lathe swings 9" and chuck capacity for stock from 1-64" to ¾" clear through. Equipped with Stark Patent Anti-Friction Draw-in Spindle and Anti-Fricton Ball Bearing End Thrust, which takes the strain off the bearings and does away with the back geared arrangement.

The Spindles and bearings are made of steel, hardened and ground to perfection, having angles of 3 degrees and 45 degrees. This principle is of great importance and is one of the essential features of the Stark Bench Lathes.

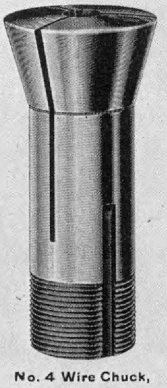
# ECONOMY IN THE WORKSHOP



The Milling Attachment, is bolted to the angle iron which is cast with the bed, making it rigid and capable of accomplishing a large range of work. It has a lengthwise feed of 6", in and out feed 2½" and up and down 4¼", with distance between centers 6". The height from bed to center is 3⅞". This attachment takes the same chucks as are used in the lathe head.

We have demonstrated to the trade that spindles made with the taper bearings are more durable, last longer, and give better satisfaction than spindles made upon other principles.

No. 4 STARK PRECISION BENCH LATHE AND MILLING ATTACHMENT.



## FOR ENGINEERS, TOOL MAKERS, ELECTRICIANS, ETC.

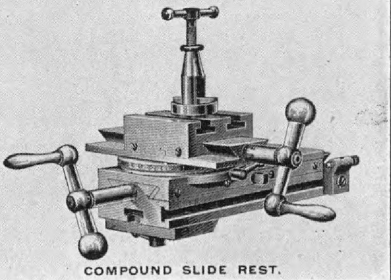
No. 4. STARK PRECISION BENCH LATHE WITH AUTOMATIC TURRET HEAD AND CUTTING-OFF AND FORMING REST.

The Automatic Turret Head has six ⅝" port holes to receive mills, drills, taps and dies, built strong and rigid, all the bearings and port holes are bushed with hardened steel, taking the place of a screw machine.

The cutting off and forming is suited for a variety of irregular formed pieces. The cutters are turned to the forms required, and only have to be ground on the face when sharpened.

No. 4 Wire Chuck, Capacity of chuck ¼"

## FIVE YEARS AHEAD OF THEM ALL.



The nose of the spindle has a thread cut 10 pitch, which is hardened and ground to a perfect standard to receive Universal Chucks, and also a supporter for step chucks. This gives a greater advantage when using the Universal chuck as the work may pass clear through the spindle.

# Swain Lubricator

## FOR SHAFTING AND LOOSE PULLEYS

Showing Shifting Lubricator Attached

consists of Brass Cup and Candle of solid substance composed of best high gravity oils and the finest petroleum products.

It is entirely automatic, requiring absolutely no attention after inserting lubricating Candle, as the indicating rod shows the amount of material in the holder at a glance from the floor.

It works only when the machine is in operation, and allows no waste from dripping or evaporation.

Where economy, convenience and cleanliness are considered, the Swain Lubricator meets the most exacting demands.

# Jeffrey 28-A Shortwall Coal Cutters

ARE SIMPLER AND STRONGER THAN ANY OTHER MAKE OF SIDE CUTTING MACHINE

*Because*

They cut across the seam faster.
They require less power per inch of coal cut.
They occupy the least amount of space.
They permit the props to be set closer to the face of the coal.

Bulletin 18 describes our various types of coal cutters. Write for copy.
